Thank you for organizing a food drive! When you fill our pantries, families can stop worrying about where their next meal is coming from and focus on their child's treatment.

Because many of our children have compromised immune systems due to their treatment, please note:

- Families cannot share large containers of food. We ask that canned goods be 16 oz. or smaller.
- All food donations must be new (directly from a store) and cannot be from personal pantries. This ensures that items are at their freshest and have the furthest possible expiration date.
- To ensure health and safety, we cannot accept home canned goods.
